DETAILED ACTION

1. Claims 3-4 and 7-21 are pending in this application.

Election/Restriction

2. Applicant's election with traverse of Group I, Claims 1-9 filed 2/6/2007 is acknowledged. The restriction requirement was made FINAL in the previous Office Action.

Applicants argue, "there was no discussion of J as a special technical feature distinguishing Group I from the other claim groups. Moreover, although election of a single disclosed species was required in the event Applicants elected Group II, all Js were apparently included within Group II". The examiner disagrees with applicant's argument. As set forth in the restriction requirement, inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features. The special technical feature of Group I is a benzo[1,3]oxazinone ring attached to a pyrrole derivative (5-membered ring with one nitrogen) is different from the special technical feature of Group II. The special technical feature of Group II is other fused oxazinones e.g. K = pyrido, pyrrole, etc. and J = alkyl, halogen, phenyl, or other heterocyclic rings and is different from the special technical feature of Group I.

DETAILED ACTION

1. Claims 3-4 and 7-21 are pending in this application.

Election/Restriction

2. Applicant's election with traverse of Group I, Claims 1-9 filed 2/6/2007 is acknowledged. The restriction requirement was made FINAL in the previous Office Action.

Applicants argue, "there was no discussion of J as a special technical feature distinguishing Group I from the other claim groups. Moreover, although election of a single disclosed species was required in the event Applicants elected Group II, all Js were apparently included within Group II". The examiner disagrees with applicant's argument. As set forth in the restriction requirement, inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features. The special technical feature of Group I is a benzo[1,3]oxazinone ring attached to a pyrrole derivative (5-membered ring with one nitrogen) is different from the special technical feature of Group II. The special technical feature of Group II is other fused oxazinones e.g. K = pyrido, pyrrole, etc. and J = alkyl, halogen, phenyl, or other heterocyclic rings and is different from the special technical feature of Group I.

Art Unit: 1624

In regard to the argument that all Js were included in Group II, the examiner requested a single disclosed species to initiate a search or to transfer the case. Because the Js are included in Group II does not mean the examiner has to search all the Js in Group I. Election of a single disclosed species is a standard procedure, when an invention is very broad or unsearchable. If applicants had been elected Group II, further restriction might have been required.

Since the restriction requirement were made FINAL in the previous Office Action, applicants have to delete the non-elected subject matter e.g. from claims 8 and 12 and delete claims 10-11 and 20-21 or file a petition for the restriction requirement.

Claims 10-11 and 20-21 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention, the requirement having been traversed.

Note that new claim 20 is not drawn to a method of preparing benzo[1,3]oxazinone ring attached to a pyrrole derivative (5-membered ring with one nitrogen). It is drawn to a method of using Formula 1a in making the intermediate compound of Formula III.

3. The claims are drawn to multiple inventions for reasons set forth in the restriction requirement. The claims are examined only to the extent that they read on the elected invention. Cancellation of the non-elected subject matter from is recommended in response to this Office Action.

Application/Control Number: 10/518,324

Art Unit: 1624

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 3-4, 7-9 and 12-19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention:

a. Regarding claim 12 (page 6, line 15), the phrase "optionally including" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

Response to arguments

Applicant's argument filed 07/10/2007 has been fully considered but it is not persuasive.

Applicants argue that the term "including" as used in Original claim 5 is not indefinite and "optionally including" is illustrated in the application itself. The examiner disagrees with applicant's argument. There is no guidance in the specification for such phrase. It is recommended that applicants amend the claim as "optionally with" to overcome this rejection.

Art Unit: 1624

b. In claims 13 and 16, the phrase "wherein the pyridine compound is selected from the groups consisting of pyridine, quinoline, isoquinoline and pyridine substituted with alkyl" is not clear. How can one select a pyridine compound from a pyridine? How can a pyridine compound selected from a quinoline compound that is bicyclic? Note that in claim 12, the claim recites "in the presence of pyridine compound" not in the presence of quinoline or isoquinoline compounds.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Conclusion

Application/Control Number: 10/518,324

Art Unit: 1624

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kahsay Habte whose telephone number is (571)-272-0667. The examiner can normally be reached on M-F (9.00-5:30).
